Site instructions

- Students can submit an assignment by clicking on the “submit an assignment” button found on the right hand of the screen, they then simply need to put in the corresponding Assignment key, and then choose their file to submit
- New instructor accounts can be created by clicking “signup” found within the login page
- Instructors first need to sign in using the login button found in the top right, use the given credentials above
- After signing in, instructors can view a list of classes as well as the assignments found within those classes
- Instructors are also able to create new courses and assignments by using the buttons found within the header
- Submissions for repositories and boiler plate code are handled separately with different buttons. The comparison for files pertaining to an assignment can be run at anytime by the instructor
